Sleep Disorders and
Insomnia, also known as sleeplessness, is a sleep disorder where people have trouble. Insomnia can occur independently or as a result of another problem. Mental disorders such as bipolar disorder, clinical depression, generalized anxiety disorder, and obsessive-compulsive disorder (OCD) can contribute to insomnia. Alcohol is often used as a form of self-treatment of insomnia to induce sleep. Sleep disorders like insomnia are fairly common in older adults. A primary sleep disorder means there isn't another medical or psychiatric cause.

The Mayo Clinic recommends 0.1 to 5 milligrams two hours before bedtime for several benzodiazepines. If quality of sleep is the main issue, behavioral therapies may be more beneficial.
